New Jersey Professional Standards for Teachers and School Leaders

New Jersey's new professional standards for teachers and school leaders were adopted by the State Board of Education in December 2003 as part of the new licensing regulations. These new professional standards provide a clear vision of the knowledge, performances and dispositions that teachers and school leaders need to support the learning called for in the revised Core Curriculum Content Standards.

Aligned with the Core Curriculum Content Standards, as well as national professional standards, New Jersey's professional standards for educators illustrate the wide range of knowledge and abilities contemporary educators must possess to provide high-quality instruction and support improved student results.

While the sets of professional standards are interdependent and interconnected, each distinct standard focuses on a specific aspect of effective practice. Each standard also has a series of indicators comprised of knowledge, dispositions, and performance statements. The knowledge statements describe the body of knowledge critical to effective practice. The disposition statements indicate the behaviors which communicate the traits and qualities valued by educators. The performance statements illustrate the application of that knowledge.

The professional standards serve as the foundation for a more thoughtful certification system, more productive pre-service education and induction programs, and more effective and relevant professional development.

Professional Standards for Teachers

Research conducted over the past decade by groups such as the National Commission on Teaching and America's Future and the Center for the Improvement of Early Reading Achievement have identified a knowledge base and the skill sets that successful teachers possess. While teaching will always be a balance between an art and a craft, there is significant data now about the skills and knowledge which bring success.

The New Jersey Professional Standards for Teachers were developed by the New Jersey Professional Teaching Standards Board (PTSB). The PTSB worked closely with national experts from the Interstate New Teacher Assessment Support Consortium (INTASC) of the Council of Chief State School Officers,

the organization that developed the national model for professional standards for teachers. The PTSB also incorporated broad input from New Jersey educators. As a result, the standards emphasize skills not present in the national INTASC model that are nonetheless important to New Jersey educators, such as a concern for teaching literacy and numeracy across the curriculum and the use of technology in instruction.

The contemporary job of the teacher is exceedingly complex, requiring a wide array of knowledge and skills.

These standards encompass the broad range of skills and knowledge a teacher needs, including deep content knowledge with varied instructional strategies; the creation of a productive learning environment; the use of assorted assessments; the understanding of human growth; the ability to work with diverse learners; strong communication skills; instructional planning; and the ability to create strong partnerships with parents, colleges, and the community. The standards also place an emphasis on reading and mathematics, because of the heightened expectations for these two areas sought by Governor McGreevey's initiatives and the *No Child Left Behind Act*.

Professional Standards for School Leaders

The new Professional Standards for School Leaders are comprehensive, forward looking and focused on teaching and learning. Based on the recommendations of the State Action for Educational Leadership Project (SAELP) Consortium, a state advisory group on school leadership policy, the State Board of Education adopted the national standards of the Interstate School Leaders Licensure Consortium (ISLLC). These are national model standards for school leaders. The ISLLC standards were developed by a consortium of states brought together by the Council of Chief State School Officers and reflect the best thinking of educators across the nation. New Jersey participated in the development of the ISLLC standards as a member of that national consortium. The state's administrators provided input through focus groups run by ISLLC across New Jersey.

The standards shift the focus of the job from one which was concerned primarily with efficient management and administration to one emphasizing the role of the administrator as the educational leader concerned with teaching, learning and school improvement. Research in the last decade has shown what a pivotal role the school leader has in promoting excellence in instruction and creating a culture that promotes improved student achievement.

The Standards for School Leaders are:

- Built from the raw materials of leadership, reflecting the actual work of the school leader;
